Sparkling Waters, Happy Guests — Tropikana Water Park, Cirebon

Making Waves with Water Quality: A Challenge for Tropikana

Maintaining clear and clean water in a bustling water park is by no means any small feat. Tropikana Water Park in Cirebon, West Java, Indonesia, faced the everyday challenge of ensuring that all its pools — from the wave pool to the kiddie pool and everything else in between — remain clean and safe for thousands of patrons. To meet this demand, powerful and reliable water management systems are a must.

WATERCO
water, the liquid of life

Waterco Limited (ASX:WAT) pioneers reliable solutions for healthy, safe water environments, which are used in residential, commercial and industrial applications in over 40 countries. Established in 1981, it has become a global brand recognised for designing and manufacturing filtration and sanitisation equipment for the aquatic, aquaculture, and water treatment sectors.

Powering Pristine Pools: A behind-the-scenes look at Tropikana Water Park's cutting-edge Waterco filtration and pumping systems, ensuring crystal-clear waters and uninterrupted fun for all visitors

Waterco's Power Play: Driving Clear Waters with Every System

For this project, Waterco supplied Tropikana Water Park with **10 Micron S900 Fibreglass Filters** and **10 Hydrostorm Plus 300 Pumps** — an unbeatable combination designed to handle high volumes of water with ease. These components, expertly installed and integrated by Indonesia's very own local pool contractor, PT. Adira Perkasa Pool, were deployed across five key attractions:

- **Wave Pool:** 500 m³ of dynamic waves for endless aquatic thrills
- **Semi-Olympic Pool:** 480 m³ of athletic strokes and competitive spirit
- **River Pool:** 520 m³ of gentle flows and peaceful drifting
- **Kiddie Pool:** 280 m³ of water-filled wonder for kids
- **Water Play Area:** 240 m³ of interactive fun and playful splashes for all ages

Effortless Maintenance, Maximum Fun

Thanks to Waterco’s reliable, advanced filtration and pumping technology, Tropikana Water Park now enjoys worry-free water quality. The Micron fibreglass filters are engineered for heavy-duty performance, reducing the need for constant maintenance. Meanwhile, the Hydrostorm Plus pumps deliver powerful circulation, ensuring all pools remain fresh, clean and safe throughout the day. The park’s operations team can now focus more on other facets of guest experiences rather than frequent system checks.

From thrilling slides to serene river pools, Tropikana Water Park delivers top-tier aquatic fun, all made possible by Waterco’s sophisticated filtration and pumping systems, ensuring great waters across every attraction

A Splashing Success

PT. Ramayana, the owner of Tropikana Water Park, couldn’t be more delighted with the results. The Waterco system has proven to be a robust and dependable solution, keeping the waterpark’s attractions pristine. Guests can enjoy crystal-clear and clean waters, while the park management team benefits from the system’s efficiency and durability, ensuring seamless operations and satisfaction all around.
